ROUTLEDGE LANGUAGE FAMILY SERIES

THE BANTU LANGUAGES

Written by an international team of experts, this comprehensive volume presents grammatical analyses of individual Bantu languages, comparative studies of their main phonetic, phonological and grammatical characteristics and overview chapters on their history and classification.

It is estimated that some 300 to 350 million people, or one in three Africans, are Bantu speakers. Van de Velde and Bostoen bring together their linguistic expertise to produce a volume that builds on Nurse and Philippson's first edition.

The Bantu Languages, 2nd edition is divided into two parts; Part 1 contains 11 comparative chapters, and Part 2 provides grammar sketches of 12 individual Bantu languages, some of which were previously undescribed. The grammar sketches follow a general template that allows for easy comparison.

Thoroughly revised and updated to include more language descriptions and the latest comparative insights.

New to this edition:

- new chapters on syntax, tone, reconstruction and language contact
- 12 new sketch grammars
- thoroughly updated chapters on phonetics, aspect-tense-mood and classification
- exhaustive catalogue of known languages with essential references

This unique resource remains the ideal reference for advanced undergraduate and postgraduate students of Bantu linguistics and languages. It will be of interest to researchers and anyone with an interest in historical linguistics, linguistic typology and grammatical analysis.

Mark Van de Velde is a researcher at LLACAN (CNRS-INaLCO) in Paris, of which he has been the director since 2015. He works on the grammatical analysis and documentation of the north-western Bantu languages and the languages of the Benue valley in Nigeria, especially those currently classified as Adamawa. He is also interested in linguistic typology and in the comparative study and reconstruction of Bantu grammar, particularly in the domain of the noun phrase.

Koen Bostoen is Professor of African Linguistics and Swahili at Ghent University and member of the UGent Centre for Bantu Studies. His research focuses on Bantu languages

and interdisciplinary approaches to the African past. He obtained an ERC Starting Grant for the KongoKing project (2012–2016) and an ERC Consolidator's Grant for the BantuFirst project (2018–2022). Apart from several research articles, he is the author of *Des mots et des pots en bantou: une approche linguistique de l'histoire de la céramique en Afrique* (2005) and co-editor of *Studies in African Comparative Linguistics, with Special Focus on Bantu and Mande* (2005), *The Kongo Kingdom: The Origins, Dynamics and Cosmopolitan Culture of an African Polity* (2018) and *Une archéologie des provinces septentrionales du royaume Kongo* (2018).

Derek Nurse edited the first edition of *The Bantu Languages* and has worked on historical linguistics, language contact, phonological change, Bantu and (East) African languages, Swahili, ethnolinguistics, the interface of linguistics, archaeology, and history and tense/aspect systems in Bantu.

Gérard Philippson edited the first edition of *The Bantu Languages* and is emeritus Professor of Bantu Languages at the Institut National des Langues et Civilisations Orientales (Paris) and member of the Laboratoire Dynamique du Langage (Lyon). He has worked mostly on East African Bantu Languages, Bantu comparative tonology and diachronic phonology, as well as culture history.

ROUTLEDGE LANGUAGE FAMILY SERIES

Each volume in this series contains an in-depth account of the members of some of the world's most important language families. Written by experts in each language, these accessible accounts provide detailed linguistic analysis and description. The contents are carefully structured to cover the natural system of classification: phonology, morphology, syntax, lexis, semantics, dialectology, and sociolinguistics.

Every volume contains extensive bibliographies for each language, a detailed index and tables, and maps and examples from the languages to demonstrate the linguistic features being described. The consistent format allows comparative study, not only between the languages in each volume, but also across all the volumes in the series.

CONTRIBUTORS

Lotta Aunio, PhD, is Senior Lecturer of Bantu Languages at the Department of World Cultures, University of Helsinki. Her research interests include Bantu languages, Nilotic languages, tone, language contact and language description.

Koen Bostoen is Professor of African Linguistics and Swahili at Ghent University and member of the UGent Centre for Bantu Studies. His research focuses on Bantu languages and interdisciplinary approaches to the African past. He obtained an ERC Starting Grant for the KongoKing project (2012–2016) and an ERC Consolidator's Grant for the BantuFirst project (2018–2022). Apart from several research articles, he is the author of *Des mots et des pots en bantou: une approche linguistique de l'histoire de la céramique en Afrique* (2005, Peter Lang) and co-editor of *Studies in African Comparative Linguistics, with Special Focus on Bantu and Mande* (2005, RMCA), *The Kongo Kingdom: The Origins, Dynamics and Cosmopolitan Culture of an African Polity* (2018, Cambridge University Press) and *Une archéologie des provinces septentrionales du royaume Kongo* (2018, Archaeopress).

Robert Botne is Professor of Linguistics at Indiana University. He is a general linguist whose research focuses primarily on the Bantu languages and on the morphology and typology of tense, aspect, mood systems.

Thera Crane is a researcher in the Department of Languages at the University of Helsinki. She is currently investigating morphosemantic variation in South African Ndebele varieties as part of the project "Stability and Change in Language Contact: The Case of Southern Ndebele (South Africa)."

Maud Devos is a researcher at the Royal Museum of Central Africa and a Visiting Professor of Swahili at Ghent University. Her main research interest lies in descriptive linguistics, focusing on coastal Mozambican Bantu languages that were once part of the larger Swahili world. She also investigates grammaticalisation processes in Bantu languages, mainly pertaining to the expression of negation (negative stacking, prohibition, negative existence and not yet), mood and modality, focus and location.

Laura J. Downing has been Professor of African Languages at the University of Gothenburg since 2012. Her research since her dissertation has focused mainly on the prosody of Bantu languages, including topics like tone, reduplication, the syntax-phonology interface and information structure. She has numerous scholarly publications to her credit on these topics, including, most recently, a book on *The Phonology of Chichewa* (co-authored with Al Mtenje) and an edited volume on *Tone and Intonation in African Languages* (co-edited with Annie Rialland).
